PROJECTS

MEDICO RECOMMENDER

It incorporates a machine learning model trained on medical data to accurately classify diseases based on symptoms. The model's predictions are then used to generate a list of the top three recommended medicines for the predicted disease.

MONITORING WOOL FROM FORM TO FABRIC

Our solution is a comprehensive mobile application tailored to the needs of the wool sector in India, addressing various aspects of the wool supply chain and empowering both wool producers and buyers. The app aims to bridge the gap between wool producers, processors, and consumers while providing essential tools and information to enhance the quality and efficiency of wool production and trading.
